2022

PROFILE

I am a passionate and hardworking 3rd-year IT undergraduate at SLIIT. I have hands-on experience in full-stack development, mobile app development, and desktop applications through university and individual projects. I am eager to apply my technical skills in a dynamic and challenging environment.

PROJECTS

Gaming Site

Technologies: Java, MySQL

Description: Developed a website to manage and display games, with admin and user functionalities.

Surplus Food Reduction and Redistribution System

Technologies: MERN Stack (MongoDB, Express.js, React.js, Node.js)

Description: Built a platform to connect donors and receivers of surplus food, promoting zero waste.

Expenses Tracking App

Technologies: Kotlin, SQLite

Description: Created an Android app to track daily expenses and generate monthly summaries.

Coconut Products E-commerce Website

Technologies: spring Boot, React, SQL Server

Description: Built an e-commerce platform for buying and selling coconuts and coconut-based products, with options for home delivery, connecting sellers and buyers efficiently.
